

For Immediate Release

FOAM-CONTROL® EPS Manufacturing Capacity Expanded

AFM Corporation is proud to announce expanded availability for Foam-Control Expanded Polystyrene products in North America.

Lakeville, Minnesota November 30, 2009 -- AFM Corporation is proud to announce the expanded availability of Foam-Control Expanded Polystyrene (EPS) and termite resistant Foam Control EPS with Perform Guard® in North America.

AFM welcomes three new manufacturing and marketing licensees to expand the number of AFM's Foam-Control licensee locations from eighteen to twenty-one. Henry Products of Phoenix, AZ, PAG Foam of Tijuana, Mexico, and UBS Foam of Lebanon, OH are now recognized as Foam-Control Licensees of AFM Corporation. These new licensees join the expanded group of Foam-Control EPS licensees as fully qualified manufacturing and marketing licensed facilities.

With the addition of these facilities, Foam-Control EPS and termite resistant Foam-Control EPS with Perform Guard will be available to a broader base of customers throughout the US. As a result of this expanded availability, AFM Corporation will also more effectively supply its national account customers needing Foam-Control EPS or Foam-Control EPS with Perform Guard products or components.

AFM Corporation requires each licensee to manufacture Foam-Control EPS under uniform prescriptive requirements of quality assurance, product standards, and building code recognition. Foam-Control EPS and Foam-Control with Perform Guard are used in numerous construction and industrial applications where structural capacity, long term insulation value, customer fabrication, product protection and cost controls are important.

For additional information about Foam-Control EPS products and where to source them from AFM Licensed Manufacturing Facilities, please visit <http://www.foam-control.com>.

About AFM Corporation:

AFM Corporation is a technology and marketing licensing company that licenses expanded polystyrene foam and structural insulated panel manufacturers throughout the US and the World.
