Nailbase 3-Ci

An easy to use 3-in-one bracing, insulation, and weather-resistive/air barrier board.

Foam-Control® Nailbase 3-Ci is the ideal three-in-one continuous insulation (Ci) sheathing board. Foam-Control Nailbase 3-Ci installs quickly over residential and commercial wood framing members using compatible pneumatic nail guns. Standard wall claddings such as wood, vinyl, stucco, cement boards, etc., can be installed over Foam-Control Nailbase 3-Ci. Foam-Control Nailbase 3-Ci consists of 7/16” exposure 1 rated Oriented Strand Board (OSB) to provide bracing, Foam-Control insulation, and film-facing to resist weather & air penetration

• Saves labor with one step installation
• Braces, insulates, and a weather-resistive/air barrier
• Saves energy - no thermal breaks
• Superior moisture resistance
• No R-value loss or thermal drift
• 4x8, 4x9, 4x10 standard boards available

Strength/R-value.

1 R-value units are °F·ft²·h/ft²·Btu.
2 Recommended for design in WARM climates.
3 Recommended for design in COLD climates.

Proven to meet, or exceed, building codes.

Foam-Control Nailbase 3-Ci is manufactured to Quality Control Program standards monitored by UL LLC and is recognized in UL ER11812-01 evaluation report.

Foam-Control Nailbase 3-Ci complies with Building Code requirements for:

• ASTM C578, Standard Specification for Rigid, Cellular Polystyrene Thermal Insulation
• ASTM E331, Standard Test Method for Water Penetration of Exterior Windows, Skylights, Doors, and Curtain Walls by Uniform Static Air Pressure Difference
• ASTM E2178, Standard Test Method for Air Permeance of Building Materials

FOAM FACTS:

Foam-Control Nailbase 3-Ci outperforms XPS and Polyiso.

• 3-Ci is bracing and insulation all in one
• Installs in one easy step
• Saves time and money
• No R-value loss or thermal drift
• Foam-Control with GPerform Guard™ treatment available to provide termite resistance
Energy Code Ci Requirements.

The use of continuous insulation is mandated by the 2012 International Energy Conservation Code (IECC). The IECC provides a prescriptive path for wall thermal insulation that includes the use of continuous insulation.

1 For use with R-13 cavity insulation
2 For use with R-20 cavity insulation

Installation.

Installation shall be in strict accordance with published instructions, details, and drawings that are part of the contract documents for the project.

1. Foam-Control Nailbase 3-Ci must be installed perpendicular to structurally sound wood framing members.

2. Mechanically fasten the Foam-Control Nailbase 3-Ci with the OSB held against the framing members using pneumatic nail guns designed to send nails through the insulation and seat firmly against the OSB.

3. Apply Foam-Control Tape over fastener heads, board joints, and corners.

4. Install wall cladding materials per wall cladding manufacturer’s specifications and recommendations for installation over continuous insulation.

Note: Climate conditions, code requirements, and building science dictate the use and position of vapor retarders within wall assemblies. Consult with local code officials and building science professional concerning the use of vapor retarders.

Termite Resistant - Perform Guard.

One of the most destructive forces anywhere is termites. Foam-Control Nailbase 3-Ci can be manufactured with Perform Guard, a proven and safe additive, that effectively resists termites.

Foam-Control Nailbase 3-Ci with Perform Guard meets ICC ES AC239, “Acceptance Criteria for Termite-Resistant Foam Plastics”.
